Quotation No.: 8341298

1 SCOPE

DC Charger up to 400kW EMC/RED and Safety testing for Europe (CE)

Assumptions:

Number of test samples to be tested (EUT): 1 (DC Charger - GOshow)
EUT total dimensions (W x H x D): ca. 840 x 1975 x 350 mm; Weight: ca. 250 kg
Power supply: 1 x AC, 3-phase with PE; 400 V 50 Hz
Power supply output: 2 x DC mains; or: DC-CPT from 30 m;
Data/Signal ports to be tested for max. cable lengths ≤ 30 m: none;
Data/Signal ports to be tested for max. cable lengths > 30 m: none;
Highest internal frequency in the EUT (incl. radio frequency): ≤ 3500 MHz;
The EUT does not contain any magnetically sensitive components

Radio applications installed in the EUT: WiFi 2,4 GHz, GSM 2G, LTE 4G

The transmitter and receiver tests of the radio applications have already been tested at the radio module level; the radio applications are operated within their approval specification;
All radio applications can be operated and monitored simultaneously;

Maximum time for the EUT to perform and respond to its operating functions: 1 seconds;
The EUT must be suitable for continuous operation; the necessary operational and monitoring equipment will be provided by the client
The definition of the tests to be performed as well as the operating modes to be tested is carried out by the client
We assume that set-up can be carried out within a maximum of 0,5 hours in each case

2 DATE

The exact date will be fixed together with you after contracting.

3 VALIDITY OF QUOTATION

This quotation is valid for **6 (six) weeks** after the date of issue.

4 ORDER

Please send us a written order with details regarding client, certificate holder and invoice recipient. You are welcome to use the enclosed order form. If the customer and the invoice recipient differ, a written declaration of cost acceptance is also required.

5 SCOPE / PRICE

TESTING		
1	Testing and test report according to: • IEC 61851-23:2014 Electric vehicle conductive charging system Part 23: DC electric vehicle charging station in combination with: • IEC 61851-1:2010 • EN IEC 61851-1:2011 Electric vehicle conductive charging system Part 1: General requirements <u>Notes/Requirements:</u> • IP 54 tests are carried out in an external partner laboratory • PEC(Power electronics converter), SECC (Supply Equipment Communication Controller) and IMD (Insulation Monitoring Devices) are already approved/certified according to relevant standards. • If EVSE is ground or wall mounted for locations with non-restricted access, mounting accessories shall be provided by the client. • The EVSE setup and operational readiness is considered to be 30 mins. The client should provide enough information and support to prevent this and to avoid additional costs. • Valid for für 1x DC Charger with max 400kW • Connector and cable have the needed pre-certification • CB Certificate will be issued after positive test result	71.000,00 €

2	EMC testing for the EU market (CE) Testing and cost-relevant parameters: Power supply while testing: 3 Phase 400 V 50 Hz Dwell time for immunity: 1 seconds Upper frequency for emission measurement: 6 GHz Modes to be tested: Emission: at 20% load At 80% load Immunity: at 20% load Waiting mode + IDLE Mode LTE Signal ports to be tested for cable length > 30 m: 0 Signal ports to be tested for cable length < 30 m: 0 Testing according to: • EN 61000-6-3:2007 + A1:2011 • EN IEC 61000-6-3:2021 • EN 61000-6-2:2005 + AC:2005 • EN IEC 61000-6-2:2019 • EN 61000-3-2:2014 • EN IEC 61000-3-2:2019 +A1:2021 +A2:2024 • EN 61000-3-3:2013 • EN 61000-3-3:2013 +A1:2019 • EN IEC 61851-21-2:2021; • IEC 61851-21-2:2018 • ETSI EN 303 446-1 V1.2.1 • ETSI EN 303 446-2 V1.2.1 • ETSI EN 301 489-1 V2.2.3 • ETSI EN 301 489-17 V3.3.1* • ETSI EN 301 489-52 V1.2.1 Testing, including an English test report	26.850,00 €
---	---	-------------

3	Radio-Integration, EU Power supply: 400 V AC 50 Hz; Modes to be tested: 3 Performing partly tests: • ETSI EN 300 328 V2.2.2 • ETSI EN 301 511 V12.5.1 • ETSI EN 301 908-1 V15.2.1 ○ Transmitter unwanted emissions in the spurious domain / TX spurious emission ○ RF output power Testing, including an English test report Pricing only in combination with item 1 of this offer.	5.200,00 €
4	Protection of persons in electromagnetic fields (EMF), for the EU market (CE) Modes to be tested: 1 Testing according to: • EN 62311:2008 • EN IEC 62311:2020 Testing, including an English test report Pricing only in combination with item 1 of this offer.	1.300,00 €

CERTIFICATION (without certification mark)		
5	• IEC CB Test Certificate (CB-Report and CB Certificate) for Pos 1	1.800,00 €

General notes for Pos 1:

- Documents, for e.g. Isolation coordination, critical PCBA layer view with color mapped potentials etc. as requested by TÜV SÜD should be provided by the customer
- Adaptations of scripts due to functional/hardware specifics of EVSE are not included in the scope of testing and will be charged as additional effort.
- For certain tests, client has to prepare the EVSE as per TÜV SÜD test plan/instruction for e.g. Temperature sensors will be installed by the customer based on the instructions provided by TÜV SÜD.
- **The fault condition tests are intentionally carried out on-site at the manufacturers or customer's development lab, rather than at the TÜV SÜD test laboratory.** The rationale behind this approach is that potential defects arising during electrical safety testing (e.g. short circuit tests, overload tests, phase mismatch, breakdown of

components, etc.) can typically be identified and resolved more quickly and efficiently within the customer's development environment. This significantly contributes to an overall faster testing process and streamlined project execution. A testing duration of three days is estimated for the on-site activities at the customer's lab.

- Physical layer for digital communication already meets the requirements of ISO 15118-3. EVSE must support CCS2 interface + ISO 15118 communication protocol.

If no standards release date is mentioned, our quotation is based on the latest standards valid at the date of this quotation. Drafts of standards will only be used when explicitly mentioned. Please be informed that the mentioned standard(s) should be seen as recommendation(s) only.

If ordered and part of the quotation certificates/attestations are issued and charged only after positive test result.

The mentioned costs are based on the provided information available at the time of creation of the quotation and require adequate approved product components with the valid country specific certifications (report, certificate) as well as smooth testing process.

Decision rule according to IEC Guide 115:2023, clause 4.3.3 will be applied.

Furthermore, we prerequisite that there are no Ex or Hazloc zones inside and/or outside the object for testing.

6 REQUIRED DOCUMENTS

The following summary is intended as help to prepare the required devices, documentation, and test samples as much as possible for testing.
It does not claim to be complete.

Product documentation in paper or preferred in pdf-file format:

- After consultation

7 GENERAL TERMS OF QUOTATION

Additional costs may occur if additional services are required, or certificates are missing. If modifications should occur during execution of the project or adjustments are unavoidable, based on facts that were not known at the time of our quotation creation, or if the project has to be delayed for reasons that cannot be attributed to us, we reserve all rights towards adjustments in prices and deadlines. In particular such additional, follow-up and/or repeated tests, expert support are not included in the quoted price and would be calculated separately.

Furthermore, the following costs are not included in the scope of the quotation and will be charged to the client:

- Shipping costs
- Insurance costs
- Customs costs and customs clearance

Expenses and fees arising for TÜV SÜD Product Service GmbH in receiving or shipping the products to be tested will be charged to the customer. We do not charge for shipping processes which have been arranged by the customer with the forwarding agents and parcel services directly.

Travel costs will be charged separately at the following rates:

• Travel cost per hour:	165,00 €/h
• Travel kilometer rate:	0,80 €/km
• Daily rate (Germany):	50,00 €/day
• Daily rate (Europe):	80,00 €/day
• Overnight accommodation fee (Germany): *	160,00 €/day
• Overnight accommodation fee (Europe): *	160,00 €/day
• Lump sum for notification process Switzerland	500,00 €
• Flight / Train ticket, fees etc.	actual expense + 10 %

* During exhibitions, other special events, and in metropolitan areas no dedicated fee is possible.

TÜV SÜD Product Service GmbH is generally free in the selection and deployment of personnel for the provision of services.

If an already placed order is cancelled, we reserve the right to charge you for the occurred efforts.

Cancellation of a test date:

If an agreed test date is cancelled, we reserve the right to charge a part of the testing costs, unless the test date cannot be resold otherwise:

Cancellation 15 up to 6 working days before start of testing	20 % of testing costs
Cancellation 5 to 4 working days before start of testing	40 % of testing costs
Cancellation 3 working days or less before start of testing	100 % of testing costs

Assumptions for EMC services:

The equipment and peripherals required for carrying out the tests and for error detection and monitoring are suitable for continuous operation and will be provided by the customer ready for testing.

Additional Expenses for EMC services:

Additional expenses (e.g. due to complex communication with the client, setup/installation work, elaboration of remedial measures, additional tests or repetition of test parts) are not included in this offer and will be charged separately after consultation.

Each order is subject to acceptance of our [General Terms and Conditions](#) and the [TÜV SÜD Testing, Certification, Validation and Verification Regulation](#), in the version valid at the time the contract is concluded.

Those are available on our homepage: <https://www.tuvsud.com/ps-gtc>

On request we can send you the TÜV SÜD Testing, Certification, Validation and Verification Regulation as well as the general terms and conditions by mail or email.

Please note that our test reports do not include an accreditation symbol or reference to accreditation and are therefore not an accredited report/certificate and are not covered by the EA MLA (European co-operation for Accreditation – Multilateral Agreement).

Please take into account that any publication of this quotation (even in excerpts) to third parties, or the anonymized transmission in particular to competing providers requires our express prior agreement.

8 TERMS OF PAYMENT

All prices quoted are excluding VAT.

Payment target:

Payment in advance

TÜV SÜD Product Service GmbH is entitled to check the creditworthiness of the customer prior to perform the contractual services. If the creditworthiness check does not achieve a satisfactory result, TÜV SÜD Product Service GmbH is entitled to only effect the contractual services in return for an advance payment. TÜV SÜD Product Service GmbH is entitled to make progress billings based on expenditure already occurred. Progress billings can be made especially on completion of part tests, interruption of tests or orders which do not lead to certification.

Handling of test samples after the examination:

- ☐ Return of the samples shall be at the client's expense
☐ Destruction of the samples shall be at the client's expense.

Please note that after examination the samples can only be stored for a limited period of time.

The services below are ordered based on and as amended in accordance with the TÜV SÜD Testing, Certification, Validation and Verification Regulation and the Standard Terms and Conditions of TÜV SÜD PRODUCT SERVICE GmbH.

* Please note that we have to charge a handling fee of 162 EUR for subsequent change of billing address. If the customer and the invoice recipient differ, a written declaration of cost acceptance is also required.
